

In item (5) of this section, the reference to "state adjoining this State" is substituted for the term "neighboring jurisdiction", for clarity.

As to item (6) of this section, the phrase "while under the supervision of a licensed psychiatrist" is revised to apply to both master's degree holders and baccalaureate degree holders. While the last clause of present Art. 43, § 122(b)(8) could be read as requiring supervision only for the baccalaureate degree holder, it is clear from Ch. 410, Acts of 1978, which enacted the provision concerning the master's degree holder, that both the baccalaureate degree holder and the master's degree holder are to be supervised.

Also in item (6)(ii)1. of this section, the present term "4 year", modifying "university or college", is deleted as unnecessary in light of the requirements for a baccalaureate degree.

The attention of the General Assembly is called to the vague term "licensed psychiatrist" that appears in present Art. 43, § 122(b)(8) -- now § 14-302(6) of this subtitle. At present, there is no health occupation board that is empowered to "license" an individual as a psychiatrist. Therefore, it is unclear what the term "licensed psychiatrist" means. It may be intended to refer to a "licensed physician" who specializes in psychiatry and is certified by the Board.

As to the adoption of rules and regulations, see the revisor's note to § 14-304 of this subtitle.
